

CURB ISSUES GAIN PORTION OF LOSS

General Rally Follows Active Demand Developed in Early Afternoon.

The curb market opened quietly yesterday and lack of bids was followed by professional pressure all through the morning. Prices gave way under selling, but losses were not large and in the early afternoon a moderately active demand developed and there was a general rally. Part of the earlier losses was recovered, but during the greater part of the session movements were uncertain.

Oils again received the bulk of activity and led the rest of the market's trend. Asphalt, after falling more than two points, was better supported, and Carb Syndicates displayed a strong tone in the late trading. Midwest Refining showed a firm tone throughout the day. Fensland Oil touched a new high for this move. With the exception of tobacco business and the industrial stocks which British American issues especially were active and moved up about a point. Small lot transactions occurred in such high priced issues as Dupont de Nemours, Royal Baking Powder and Phelps Dodge. Ray Verde, in the most active session, Tonopah Divide was heavy toward the close.

Bonds were again active, but their changes were mixed. Norway 8s reacted after early strength, while Allied Packers were in constant demand, moving about 3 points higher. Solvay et Cie 8s were introduced to the market. Total sales and range of prices follow:

INDUSTRIALS.

Sales.	High.	Low.	Last.	Chg.	Net.
